PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience building scalable web applications using React.js, Node.js, Express.js, MongoDB, PostgreSQL, Redis, and TypeScript. Experienced in designing responsive user interfaces, developing secure REST APIs, implementing authentication and real-time communication, and deploying containerized applications using Docker and CI/CD. Strong foundation in Data Structures, Algorithms, DBMS, Operating Systems, Computer Networks, and System Design with a passion for building scalable, production-ready software.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, SQL, Python
Frontend: React.js, Redux Toolkit, React Hooks, React Router, Tailwind CSS, Bootstrap, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, WebSockets, JWT, OAuth 2.0, Zod
Databases: MongoDB, PostgreSQL, Prisma, Redis
Cloud & DevOps: Docker, Kubernetes, GitHub Actions, AWS (EC2, S3), Linux, Vercel
Monitoring: Prometheus, Grafana, Loki
Developer Tools: Git, GitHub, Postman, Axios, Monaco Editor
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

PROJECTS

CodeNexus – Online Coding Practice & Evaluation Platform [GitHub](#) | [Live Demo](#) Nov 25 – Dec 25

- Developed a full-stack coding platform enabling secure authentication, multi-language code execution, AI-assisted debugging, and real-time compiler feedback.
 - Built responsive React.js interfaces with Redux Toolkit, React Hooks, Tailwind CSS, and Monaco Editor, delivering a VS Code-like coding experience.
 - Engineered scalable REST APIs using Node.js, Express.js, MongoDB, and Judge0 API for asynchronous code execution, submission evaluation, and result processing.
 - Implemented JWT authentication, OAuth 2.0, OTP email verification, Redis-backed token revocation, and schema validation using Zod to strengthen application security.
 - Containerized the application with Docker, integrated Prometheus, Grafana, and Loki for observability, and optimized frontend performance to achieve Lighthouse scores of 100 (Performance & SEO).
- Tech Stack:** React.js, Redux Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Redis, Judge0 API, Gemini API, JWT, OAuth 2.0, Docker, Zod

GST Invoice Generator – Cross-Platform Billing Application [GitHub](#) | [Live Demo](#) Jul 2025 – Aug 25

- Developed a cross-platform GST billing application using React Native and Expo for creating, managing, and sharing GST-compliant invoices.
 - Built reusable components and dynamic invoice forms supporting real-time CGST, SGST, and IGST calculations through GSTIN-based state code parsing.
 - Implemented scalable navigation using Expo Router and React Hooks, improving state management, modularity, and code reusability.
 - Integrated invoice preview, PDF generation, printing, and sharing workflows using WebView, Expo Print, and Sharing APIs.
 - Consumed REST APIs with Axios while implementing client-side validation, loading states, and robust error handling for a seamless user experience.
- Tech Stack:** React Native, Expo, TypeScript, Expo Router, Axios, React Hooks, WebView

EDUCATION

Lovely Professional University <i>Bachelor of Technology in Computer Science and Engineering — CGPA: 7.80/10</i>	Aug 2023 – Present Phagwara, Punjab
B.N Saha DAV Public School <i>Intermediate — Percentage: 83%</i>	2021 – 2022 Giridih, Jharkhand

ACHIEVEMENTS

- Secured AIR 7 in Coding Ninjas Premier League.
- Achieved a maximum LeetCode Contest Rating of 1653.
- Solved 600+ Data Structures and Algorithms problems across LeetCode and GeeksforGeeks.
